

Locomotiva elettrica BB 260000, SNCF

SNCF

Epoca: IV

- 14+

N. art.: 73855

=

€199,00

Electric locomotive BB26000 of the french state railways. Epoch IV. Motor with flywheel. Plux22 Interface for the adaptation of a digital decoder. Drive on four axles, one of them has traction tyres. Coupler pocket according to NEM 362 standards with close coupling mechanism. LED light changeover according to the french original. Finely detailed new construction with separately inserted pieces. The treads of the model are reproduced with fine perforations. The cosmetic highlight is the perforated roof top as an etched part - Perforated treads - Fine etched parts on the roof - Finely detailed pantograph design

Dati tecnici:
